INFLUENZA VACCINE

Golden Ages Home Care

INFLUENZA is a viral illness easily transmitted from person to person through air droplets passed by sneezing, coughing, and a lack of adherence to appropriate hand hygiene guidelines.

Healthcare workers have been shown to be one of the main sources of influenza transmission to geriatric patients during the flu season. Vaccinating healthcare workers can add an additional level of protection for our patients.

Vaccination is a safe way to prevent infection, reduce the severity and duration of illness, and decrease the spread to others. It is strongly encouraged for healthcare workers who have increased exposure.

Golden Ages Home Care strongly recommends a yearly flu vaccination for our employees and we annually track employee influenza vaccinations.

PLEASE COMPLETE THE FOLLOWING FOR OUR RECORDS
